

## "Yoda's Jungle Serenity:

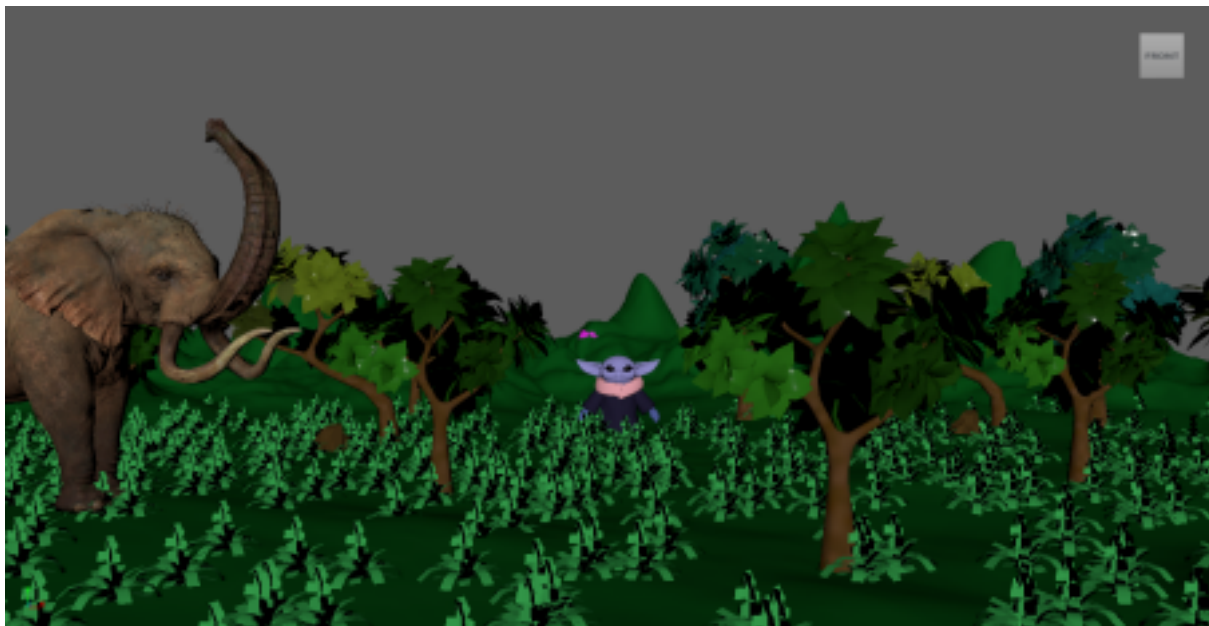

### A Star Wars-Inspired 3D Maya Marvel"

**Janhvi Khattri**

**Branch:-CSE**

**22CS3030**

The project is done using "Autodesk Maya" in 3D. The scene depicts an alien enchanted by a butterfly and playing with it inspired from famous "Star War" franchise the character "Yoda" an alien is used . Background includes the presence of trees, shrubs, mountain range and an elephant. The scene shows an image of a jungle where the alien is roaming.

#### ***Animations done are:-***

- 1.) The butterfly flapping its wings
- 2.) The motion of butterfly in a set path
- 3.) Alien(yoda) facial change and hand motion
- 4.) Elephant trunk movement

#### ***About the project:-***

--> Figures in this project were created using 3D polymodeling section and various polygons like cube, sphere, cylinder etc.

-->For figure of alien and elephant sculpting tool was used after smoothing the figures.

-->Figures like trees and shrubs were made using polyplane and bend it into leaf figure

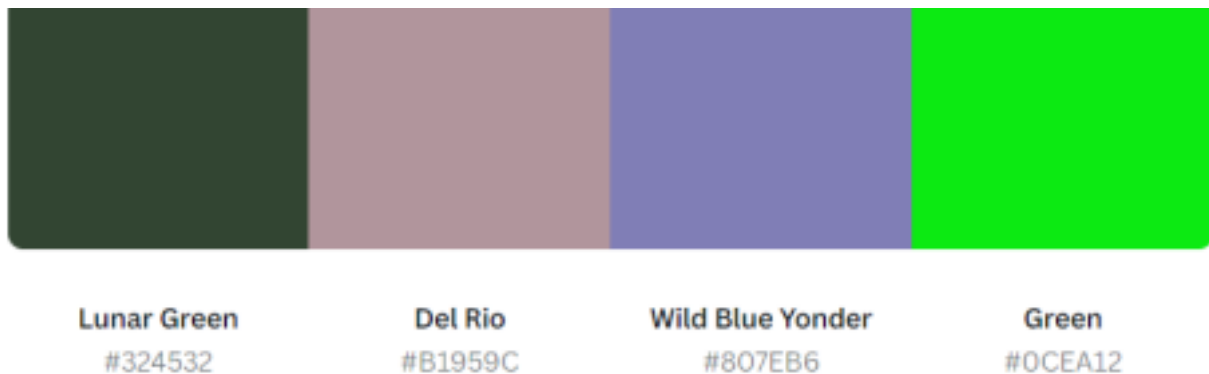

-->Tree trunk were made using cylinder and curved into the given shape -->

Jungle terrain was sculpted using polyplane followed by subdividing it into 1000 x 1000 parts and sculpting it into mountain like terrain --> For color filling multiple layers of colors had been used to color the elephant

→ To animate elephant, alien, and butterfly first the figure was rigged using the rigging section in maya

Placing of figures was done using moving, rotating and scaling tools.

***The color pallets of the project are.***

The final arnold view is
